

Utah Health Information Network (UHIN) is the state-designated Community Health Information Exchange (CHIE) for Utah and surrounding regions.

Real-time CHIE Alerts for improved care coordination.

With CHIE Alerts, hospitals, medical centers and more are able to securely sending notifications of hospitalizations, ED visits, and COVID-19 lab orders and diagnoses through UHIN to other healthcare organizations. This real-time information allows care teams to coordinate interventions for their patients more effectively, especially those in greater need of physician oversight. It also keeps hospitals in compliance with new interoperability rules in the industry.

How we do it

We know data. We are experts in both clinical and claims data.

We offer a full-service clearinghouse.

We operate the CHIE.

We provide analytics and business intelligence solutions.

We actively participate in standards development.

We share our knowledge with the healthcare community.

We bring healthcare education events directly to the community.

We operate as a non-profit.
